

INDUS INSTITUTE

Of

Information & Communication

Technology

Department of Computer Science

M.Sc. Cyber Security

2nd Semester

Subject Name: Reverse Engineering and Malware Analysis

Subject Code: MSCY0203

Submitted To: Mr. Anjani Tiwari

Submitted By: Punit Soni (IU2454520053)

CERTIFICATE

This is to certify that

Mr. Punit Soni with

*Enrollment number **IU2454520053** Semester **2** has*

*successfully completed his/her laboratory experiments in the **Reverse Engineering and Malware Analysis (MSCY0203)** from the department of **IIICT-M.sc cyber security** during the academic year*

2024 - 25

Date of Submission:

Staff in charge: Mr. Anjani Tiwari

Head of Department:

TABLE OF CONTENTS

Sr. No	Experiment Title	Page no.	Date	Signature
1	Malware Analysis Report Using Ghidra or IDA PRO.	1	08/01/2025	
2	Dynamic analysis of malware samples using a virtual machine and tools such as Process Monitor, Wireshark, and Sandbox.	5	15/01/2025	
3	Memory analysis of malware samples using tools such as Volatility.	8	22/01/2025	
4	Analyzing malicious documents such as PDF files and Office documents using tools such as PDFStreamDumper, oledump, and OfficeMalScanner.	11	29/01/2025	
5	Reverse engineering malware using reverse engineering frameworks such as Radare2.	13	05/02/2025	
6	Analyzing malware that uses anti-analysis techniques to evade detection.	17	12/02/2025	
7	Analyzing Malware That Uses Cryptographic Techniques to Hide Its Functionality.	20	19/02/2025	
8	Analyzing malware that targets specific industries or geographic regions.	22	05/03/2025	
9	Analyzing malware that uses rootkits to hide its presence on a system.	24	12/03/2025	
10	Conducting threat intelligence analysis to understand the motivations and goals of malware authors.	27	02/04/2025
